Professional Summary

Full Stack Developer with 4+ years of experience architecting high-performance React frontends, Node.js backends, and scalable Micro-Frontend architectures. Track record leading engineering teams, integrating REST APIs and cloud services, and driving release-cycle improvements of up to 50% across enterprise onboarding and CRM platforms.

Technical Skills

Frontend: React.js, TypeScript, JavaScript (ES6+), Redux, Context API, React Query, HTML5, CSS3, Tailwind CSS, Webpack 5, Vite, Module Federation

Backend: Node.js, Express.js, REST API Design, MongoDB, PostgreSQL, Serverless Framework

DevOps & Cloud: AWS (Lambda, API Gateway, S3, CloudFront, EC2, SQS, EventBridge), Docker, CI/CD, Nginx, Git

Practices: System Design, Micro-Frontends, Component Libraries, Design Systems, Agile/Scrum, Jest, React Testing Library, Code Reviews

Professional Experience

Gemini Solutions, Gurgaon

Jan 2022 – Present

Senior Software Engineer L2 | *Tata AIG – User Management and Onboarding Platform*

- Architected the onboarding platform's frontend and backend services using React, Node.js/Express, and MongoDB, reducing onboarding time by 60%.
- Built REST APIs for Aadhaar, PAN, and document verification integrations, eliminating 80% of manual data entry and 40% of duplicate code.
- Implemented Role-Based Access Control at the API layer and WebSocket-driven notification services for real-time approval and status updates.
- Collaborated with frontend and QA teams to ship reliable, production-grade services, resolving critical issues with zero post-release regressions.

Senior Software Engineer L1 | *Emaar Group – Helpdesk Tool*

- Designed a JSON-driven form builder backed by Node.js/Express APIs, enabling 100+ configurable workflows and reducing development time by 40%.
- Led a team of 6 engineers through Agile sprints, establishing code review and API design standards that cut production bugs by 25%.
- Implemented a Micro-Frontend and microservices architecture using Webpack 5, Module Federation, and Node.js services, cutting release cycles by 50%.
- Owned the CI/CD pipeline and Nginx deployment configuration (99.9% uptime) and raised backend test coverage from 45% to 85% with Jest.

Software Engineer L2 | *Tata AIG Insurance – CRM Platform*

- Designed and deployed serverless microservices using AWS Lambda, API Gateway, SQS, and EventBridge, improving scalability to handle 5x traffic spikes.
- Built Micro-Frontend UIs with React, Webpack 5, and Module Federation, integrated with backend services via REST APIs.
- Implemented a secure, event-driven architecture with MongoDB, processing 100K+ daily transactions.

Software Engineer L1 | *Sharemeister Inc, USA – Ahura & Athletic Estate*

- Developed 5 cross-platform applications using React, TypeScript, and Node.js/Express with modular architecture, scaling to support 10K+ concurrent users.
- Engineered a WebRTC video chat backend with automated FFmpeg transcoding and AWS S3 storage, reducing video processing time by 45%.
- Optimized REST APIs and PostgreSQL queries through indexing and query refactoring, achieving a 60% reduction in response times.

Open Source Projects

MUI Smart Form Builder (NPM)

- Authored a React/TypeScript form library rendering and validating fields via JSON-schema, improving form accuracy and reducing development time.

MUI Smart Table (NPM)

- Constructed a responsive React data table with server- and client-side pagination, multi-column sorting, filtering, expandable rows, and custom cell rendering.

Resume ATS Checker (GitHub)

- Launched a Next.js app that parses PDF/DOCX resumes and scores them against job descriptions via the Gemini API.

Education

Bachelor of Engineering (B.E.), Panjab University, Chandigarh (2018–2022) | CGPA: 7.72/10
